- Create Virtual Control Panel using off-the-shelf Touch Screen Monitor
- Connect Touch Screen Monitor
  - Touchscreen USB to USP3-TSA
  - USP3-TSA HDMI Output to Monitor  
Or  
Multi-viewer Output to Monitor
- Multi-viewer
  - Touch image to go full screen
  - Touch again for multiple images
- Virtual Control Panel
  - Touch Screen to Execute Action
  - Tally Remote Device
- Works with DNF's Control Ecosystem:  
GTP, AIB, & IP Control Buddy products
- Web-browser based Setup and Configuration
- Ethernet 100Mbs Full Duplex

### Virtual Control Panel

The USP3-TSA turns any off-the-shelf touch screen monitor into a virtual control panel capable of controlling and monitoring just about anything! Touch the screen to send IP commands to a GTP-32 Control Processor, USP3 Universal Switch Panel, AIB-3 AnyWhere Interface Box, & IP Control Buddy. Touch the screen to send IP control commands to a multi-viewer to select one image. Touch again to return to multiple images.

### Easy Setup

Using a standard web browser place and size buttons, assign functions to buttons, enter button text, and select button colors. Simply choose options from the drop-down menu and complete the text boxes. Save the TSA's configuration to your PC.
